Pode-se também utilizar mais de um disco rígido, e até mesmo ter a utilização de sistemas com RAID. A distribuição OpenSuSE Linux permite definir sistemas RAID na fase de instalação do sistema operacional.

Após a realização do particionamento, deve-se clicar no botão “Pronto” para continuar a instalação.

A sexta tela apresentada irá permitir que se faça a escolha de mais alguma opção de fonte de instalação, isto é, de mais um local além do DVD para se instalar o Mandriva Linux 2010 e seus pacotes.

Caso seja necessário instalar mais algum aplicativo, que não esteja incluído no DVD disponibilizado pela Mandriva, deve-se escolher uma das opções apresentadas: “CD-ROM”, “Rede (HTTP)”, “Rede (FTP)” ou “Rede (NFS)”.

Esta instalação foi feita apenas com o DVD Mandriva Linux 2010, sendo escolhida a opção “Nenhum” para indicar que nenhuma fonte adicional será utilizada para a instalação do sistema operacional.
